PROFESSIONAL SUMMARY

Results-driven Computer Science undergraduate with strong core expertise in Java, Data Structures & Algorithms, OOP, DBMS, and Computer Networks. Experienced in software development, web technologies, REST APIs, and database management, alongside practical exposure to AI/ML and real-time systems. Seeking a Software Engineering Internship or entry-level Software Developer role to leverage analytical problem-solving skills and contribute to building high-performance software solutions.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript
Web & API Technologies: HTML5, CSS3, REST APIs
Databases: MySQL, MongoDB | **Query Languages:** SQL
Cloud & Deployment: AWS, Vercel
Tools & Frameworks: Git, GitHub, VS Code
Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Computer Networks (CN)

EDUCATION

QIS College of Engineering and Technology, Ongole, AP 2023 – 2027
B.Tech – Computer Science & Engineering | CGPA: 9.07

Narayana Junior College, Ongole, AP 2021 – 2023
Class 12 (MPC) | Board of Intermediate Education | 97.5% (975/1000)

Sri Chaitanya High School, Chimakurthy, AP 2020 – 2021
Class 10 | Board of Secondary Education, AP | 100% (600/600)

EXPERIENCE

Web & Mobile App Development Intern - *Avishkarana Andhra Summer Internship (BCL)* May 2026 – Jul 2026

- Engineered responsive web applications utilizing HTML5, CSS3, JavaScript, and modern REST APIs.
- Collaborated on version control workflows with Git and GitHub, implementing structured code reviews for a team of five developers.

Java Full Stack Developer Virtual Intern - *EduSkills Academy (AICTE)* Apr 2026 – Jun 2026

- Developed Java web application modules and implemented SQL-based CRUD operations for backend development and database management.

AI/ML Virtual Intern - *EduSkills (AICTE & Google for Developers)* Apr 2025 – Jun 2025

- Applied Python for data preprocessing and feature engineering, training supervised machine learning models to achieve 90% prediction accuracy.
- Strengthened understanding of real-world analytical problem-solving techniques by analyzing three diverse datasets.

PROJECTS

Farm to Home (Agricultural E-Commerce) | HTML5, CSS3, JavaScript, MongoDB, REST APIs

- Constructed a full-stack direct-to-consumer marketplace connecting local farmers directly with buyers to eliminate intermediaries and ensure fair crop pricing.
- Implemented database schemas and REST API services using MongoDB and JavaScript to streamline inventory tracking and order processing.

Rail Swap (Railway Seat Swap Platform) | TypeScript, Supabase, Tailwind CSS, REST APIs

- Programmed an interactive web application enabling daily passengers to coordinate seat exchanges and match optimal swap options in real time.
- Integrated automated ticket verification algorithms and REST API backend services to streamline ticket verification and exchange workflows.

AI Safe Network | Python, ESP32, Socket.io, Supabase, Chrome Extension

- Built a multi-layered security ecosystem featuring an ESP32 hardware DNS gateway to intercept network traffic and block malicious domain requests.
- Developed a heuristic AI threat engine paired with a Chrome extension and Socket.io web dashboard for real-time domain filtering and threat alerts.

CERTIFICATIONS & ADDITIONAL INFO

Certifications: NPTEL: Programming in Java, Data Analytics with Python, The Joy of Computing Using Python
• freeCodeCamp: Responsive Web Design • APSCHE: Quantum Fundamentals Program
Soft Skills: Problem-solving, Team Collaboration, Analytical Thinking, Communication, Time Management
Hackathons: Participated in Mission Y4 Prakasam Police Hackathon 2026, Smart India Hackathon (SIH) 2026
Leadership: Class Representative (QIS College) - Coordinated academic schedules and resolved student concerns.
